

## VendorINSIGHT® Introduces VIVE™ to Complement Class-Leading Software Solution

Companies Outsource Vendor Due Diligence, Financial Reviews, SSAE16 Reviews for Efficiency

**January 25, 2012. Cincinnati, OH** –VendorINSIGHT®, the enterprise-class vendor management system offered by CMPG, announced today the introduction of new outsourced services to complement its class-leading software. VIVE™ reports –financial reviews and SSAE16 reviews for vendors prepared by CMPG's professional services group – are now integrated into the service and delivery model for VendorINSIGHT®.

"VIVE™ reports help our customers automate and streamline the financial and SSAE16 reviews for their vendors. Often, these activities are a burden and distraction for many organizations yet they are important," says Fran Baltmiskis, Executive Partner at CMPG. He adds, "When an IT manager is required to have a financial review completed for a new vendor, he often has to request the review from a finance or accounting group which means he may wait several days or even weeks if other priorities like month-end or year-end closing are in the way."

VendorINSIGHT® supports every aspect of the vendor management, from sourcing events and RFPs through vendor due diligence, information security reviews, financial and SSAE16 reviews, risk evaluation, vendor selection and contracting. The launch of VIVE™ has been well received amidst widespread demand for the services.

"VIVE™ is about efficiency," says Baltmiskis. "We prepare the reports for each vendor and create all of the documentation online as the analysis is completed so the customer sees it directly in VendorINSIGHT® without shuffling reports and emails and without having to enter data into the vendor management system."

VendorINSIGHT® is the foremost vendor management system and is the leader in vendor management among Governance, Risk and Compliance (GRC) solutions providers and enterprise-class software providers. For third party and vendor relationship, risk, performance, and documentation management, its features are unmatched. VendorINSIGHT® integrates to CMPG's newest GRC solution for business continuity planning, BCPINSIGHT™.
